

Info Population Dynamics, EERCv 2020

Before the session, please make sure that you have R and RStudio , as well as the packages `popbio` (for demographic analysis) and `knitr` (for visual stuff) installed on your computer. Please also make sure to **bring your computer to both the morning and the afternoon session** as we will switch between lecture and practical exercises throughout the day.

Webpage

All material will be uploaded to <https://fogelstrom.github.io/popDynamicsEERCv/> . *This is a temporary webpage so save anything that you want to keep to your personal computer* (for example by printing the pages to a pdf-file)

Assignment

The assignment is included in the instructions for “1. Population Projections” and “2. Sensitivities and elasticities”. Hand in the the assignment by 28 February.
